Bulbs for fall
planting
Cultural Directions

Bulbs may be planted any time from October 1st until the ground is frozen solid. They succeed in any good garden soil, and while it is more desirable to have a light, sandy loam, this is not as essential as having the soil, no matter what its quality, in a well-spaded and prepared condition, and to furnish the proper drainage conditions if planted in a situation where water has a tendency to stand at any time. Plant four inches apart and four to five inches deep. Tulips are perfectly hardy, so that only a slight protection is required during the cold winter months.

Darwin Tulips

These beautiful tulips have well been called "The Tulip Aristocrat." Their brilliant coloring and large cup-shaped flowers borne on long stems make them unsurpassed for May blooming in the garden. Their lasting qualities make them very desirable for cut flowers. They bloom from the middle of May to the first of June.

Breeder Tulips

The Breeders are a most attractive class for the many tulip fanciers who are interested in the revival of the taste for "art colors." The flowers are self colored in dull or soft tones of buff, bronze or purple and among them will be found some of the most splendid and beautiful of all tulips; they are usually large, of excellent form and borne on tall, sturdy stems. Not only on account of their large size and odd but beautiful colors, but also because of their great lasting qualities, this class is becoming very popular for garden decoration. If planted in combination with the more brilliant Cottage or Darwin sorts they produce a display in the early summer months that is most effective. Culture: The same as that for Darwin Tulips.

Cottage Tulips

The Cottage or May Flowering Tulips compete with the Darwin class for popular favor. This type differs from the Darwins and Breeders in having long pointed flowers of which the petals are sometimes turned back. Some flowers are very prettily shaped and all are borne on nice long stems. They bloom a few days later than the Darwins, often carrying the flowering period of Spring bulbs into the early days of June, especially if planted in a shady position. The colors are very bright and clear and almost every known shade is to be found among them, especially the pure yellows which are not found among the others. Some varieties are highly perfumed. Planting directions the same as those for Darwin and Breeder Tulips.

Triumph Tulips

Triumph Tulips are a crossing between Darwin Tulips and Single Early Tulips. In the past few years Triumph Tulips have been tried out by leading growers, who unanimously were elated over their excellent results. Their substance is unsurpassable and they last from ten days to two weeks longer than any other kind. They are very fine for the border and garden on account of their tall, strong stems and their colors. In Triumph Tulips one can find the shades of the brightest Early Tulips, the soft glow of the Darwins, the catching combination of the two colored varieties, and the dull gloss of the Breeders. They come into bloom about 10 days earlier than the Darwins and Breeders and bloom right along with these favorite sorts. We advise our customers to give the Triumph Tulips a trial for which purpose we can recommend the following leading varieties:

	Doz.	100
ALBERIO. Cerise-scarlet.....	\$1.25	\$9.00
DENBOLA. Red with yellow border.....	1.50	10.00

RHINELAND. Yellow with red edge.....	2.00	15.00
TELESCOPIUM. Violet-rose.....	1.25	9.00
TOSCA. Dark red, rose border.....	1.00	7.00
VIRGO. Clear violet.....	1.25	9.00
EXTRA CHOICE MIXED.....	1.00	7.00

Single Early Tulips

This class gives us the first bright flowers in Spring, usually blooming about the middle of April to the first of May. The uniformity of their height and their upright short stems make them very desirable for planting in beds, parkways and similar locations.

	Doz.	100
CRAMOISI BRILLIANT. Bright red.....	.70	\$5.00
COULEUR CARDINAL. Brilliant red.....	.70	5.00
DIANA. Pure white.....	.70	5.00

WHITE HAWK. Pure white.....	.75	5.50
YELLOW PRINCE. Clear yellow.....	.70	5.00
EXTRA CHOICE MIXED.....	.70	5.00

Double Early Tulips

The Double Tulips bloom a little later than the Single Tulips and their large peony-like flowers last longer. They are very bright and make a grand showing in the garden and border.

	Doz.	100
BOULE DE NEIGE. Pure white.....	.80	\$5.75
COURONNE D'OR. Yellow and orange.....	.75	5.50
EL TOREADOR. Scarlet, edged buff yellow.....	.75	5.50

TOURNESOL. Red with yellow edge.....	.75	5.50
VUURBAK. Dazzling red.....	.75	5.50
EXTRA CHOICE DOUBLE MIXED.....	.75	5.00

Late Double Tulips

Blooming in May with the Darwin and Cottage Tulips, these beautiful varieties make a wonderful showing in the garden and as cut flowers. The flowers borne on long stems are large and double and look more like Peonies than Tulips.

	Doz.	100
BLUE FLAG. Clear violet blue.....	\$1.25	\$9.00
LA BELLE ALLIANCE. Blue and white feathered.....	1.25	9.00
YELLOW ROSE. Golden yellow.....	1.00	7.00

Parrot Tulips

Remarkable for their fantastic form and coloring. The flowers are large and each is gracefully cut and fringed while the colors are of such wonderful combinations that they resemble the plumage of a beautiful parrot. They bloom about the same time as the Darwin and Breeder Tulips. The bulbs are not as large as the other varieties of tulips but they have large flowers.

	Doz.	100
LADY DERBY. Silvery rose lilac.....		
Each, 40c.		
FANTASY. Beautiful pink.....	\$1.50	\$11.00
ADMIRAL DE CONSTANTINOPLE. Red with orange shading.....	.75	5.00

CRAMOISI BRILLIANT. Rich deep red.....	.75	5.00
LUTEA MAJOR. Yellow, striped scarlet and green.....	.75	5.00
MARKGRAAF. Brownish red, feathered orange and purple.....	.75	5.00
CHOICE MIXED PARROT TULIPS.....	.75	5.00

**Tulips for the Rock Garden
Botanical Tulips and Species**

The following tulips are wild species and are mostly used for rock gardens and borders on account of their short stems.

	Doz.	100
CLUSIANA (The Lady Tulip). White, shaded red.....	.85	\$6.00
EICHLERI. Crimson-scarlet.....	.85	6.00
GEIGII. Brilliant orange-red, very large flowers of fine form.....	3.00	20.00
KAUFMANNIANA (The Water Lily Tulip). Creamy white, marked carmine-red.....	1.00	7.50
SYLVESTRIS (Florentina Odorata). Butter-yellow.....	.95	7.00

Lily Flowering Tulips

A distinct new and handsome class of tulips, resulting from crossing the dainty pointed-petal Cottage Tulips, Retroflexa, with a pink Darwin. They have beautifully reflexing flowers on tall graceful stems. They look more like colored lilies than tulips. They bloom at the same time as the Darwin, Breeders and Cottage Tulips.

	Doz.	100
ALASKA. Pure golden yellow.....	\$1.00	\$7.50
ARTEMIS. Beautiful carmine rose	.75	5.50
ECLIPSE. Orange-yellow, flushed pink	.75	5.50

SIRENE. Rich carmine rose-red, looks like a rose colored lily.....	.70	4.75
VIRIDIFLORA PRAECOX. Soft pale green with cream-yellow edges, looks like a green lily. Each, 50c		
WHITE CROSS. Pure white. Each, 25c		

Bunch Flowering Tulips

Something new in tulips. Have from 3 to 5 blossoms on the stem, blooming all at the same time. An interesting novelty. Give it a trial. Height 18 inches.

	Doz.	100
MONSIEUR MOTTET. Ivory-white, slightly edged pink.....	\$.80	\$6.00
MADAME MOTTET. Brilliant carmine-rose	1.10	8.00

Striped and Feathered Bybloem Tulips

These tulips are of an old race which has been grown in Holland and France since the beginning of the seventeenth century and which caused the famous tulip craze in 1635. Bybloems are queerly striped and feathered rose or violet on a white ground. They flower about the same time as the Darwin and Breeder Tulips and are from 18 to 23 inches high.

	Doz.	100
GLORY OF HOLLAND. Pure white, feathered and flamed violet-purple. A lovely tulip and a great exhibition variety. Each, 10c	\$1.00	\$7.00

Crocus

Among the earliest to blossom in Spring is this beautiful little flower, lifting its head almost before the snow has disappeared. Although most showy when massed in large beds, or when planted in lines of distinct colors, a very desirable effect is produced by setting crocuses here and there over the lawn. It is only necessary to lift the turf and insert bulbs about 2 inches deep. This gives a pretty effect in early Spring and the tops can be cut along with the grass safely when the first mowing is made. Indoors the crocus can be easily forced if growth is maintained at a low temperature. Put 6 to 12 bulbs of the named varieties in a 6- or 8-inch pot. Keep cool, well-watered, gradually bring to full light and give plenty of fresh air.

	Doz.	100
BARON VON BRUNOW. Dark purple-blue	\$.40	\$3.00
MONT BLANC. Pure white.....	.40	3.00
MAMMOTH YELLOW. Rich yellow	.40	3.00
SIR WALTER SCOTT. Striped purple and white.....	.40	3.00
MIXED COLORS of above named varieties	.40	3.00

Hyacinths

The hyacinth is so well and favorably known that it is unnecessary to give any detailed description of its broad upright spike or truss, usually thickly set with bell-shaped flowers of beautiful waxlike texture. It succeeds well in the house and garden, adorning both with the varied colors and delicious fragrance of its showy flowers. Its culture is about the same as that of the tulips, except that for outdoor planting the bulbs should be planted 5 inches deep and from 5 to 8 inches apart, and should have a little protection during the cold winter months.

	Each	Doz.
GERTRUDE. Deep pink.....	\$.10	\$1.00

CITY OF HAARLEM. Yellow.....	.10	1.00

Narcissus or Daffodils

(All Mammoth Double Nose Bulbs)

The graceful and charming narcissus or daffodils are being planted more every year because they are so adaptable. Most varieties do splendidly in the house, and they are perfectly hardy for outdoor planting. When once established they do not need to be reset for several years and will thrive in almost any good garden soil. A cool and grassy place is favorable for naturalizing. For outdoor planting, plant 6 inches deep and

5 to 8 inches apart. For house culture put 3 to 4 bulbs in a 6-inch pot and treat the same as early tulips and hyacinths. In describing narcissus, reference is made to the "perianth" and "trumpet." The latter is the long center, funnel-shaped tube, and the "perianth" is the outer row of petals or wings.

	Doz.	100
ALBA PLENA ODORATA. The well known Double White Poeticus Narcissus. Pure white double flowers. Blooms late.....	\$.75	\$5.00

MIXED NARCISSUS AND DAF-FODILS	.80	6.00

Jonquils

These small graceful narcissus are very much admired for their graceful, sweet-scented yellow flowers. They are very satisfactory for outdoors when planted in large groups or masses, and make splendid edgings to beds of some of the taller narcissus. For indoor growing three or four bulbs should be put in a 4- or 5-inch pot.

	Doz.	100
SINGLE CAMPERNELLE. Single, yellow florets, very fragrant.....	\$.75	\$6.00
DOUBLE CAMPERNELLE. Double, yellow florets, very fragrant....	.75	6.00

Paper-White Narcissus

(For Growing Indoors)

These very popular flowers of great fragrance are seen in practically every home during the winter months. They are easily grown in bowls with gravel and water, and will bloom in four to six weeks from planting.

Snowdrops

(Galanthus)

In early Spring there is nothing more beautiful than these little Spring flowers with their dainty drooping heads of glistening pure white. In beds of tulips and hyacinths, snowdrops flower while these bulbs are just moving to the surface, and when the flowers are over, there remains a groundwork of green foliage. Perfectly hardy and will grow almost anywhere. Plant bulbs about 2 inches deep.

	Doz.	100
SINGLE	\$.50	\$3.25
DOUBLE	.70	5.00

Glory-of-the-Snow

(Chionodoxa)

Considered one of the hardiest, most easily cultivated and one of the most beautiful of the early Spring flowering bulbs. When established, its sheets of blue in very early Spring are a great attraction in borders, dotted over bulb beds or for massing in the rock garden. Height about 5 inches.

	Doz.	100
LUCILIAE. Bright blue with large clear white center.....	\$.40	\$3.00

Winter Aconite

(Eranthis Hyemalis)

Early in Spring the golden blossoms of Winter Aconite look charming, resting on an emerald-green cushion of leaves, forming a striking contrast to the snowdrops, scillas and chionodoxa. The foliage remains long after the flowers, making the plant especially valuable in moist situations, such as under trees. Also fine for rock gardens. Grows about 8 inches high.
